Why Support Us

Susan G. Komen for the Cure® is the global leader in raising awareness of breast cancer. We are the community network of breast cancer survivors.

Together we work to:

Saving Lives

Empower the community around us Ensure quality care

Energizing science to find the cure

What is Cancer?

In a healthy body, natural systems control the creation, growth and death (called apoptosis) of cells. Through the natural cycle of life, cells divide to make new tissue as older cells die. When tissue is injured, say by a cut on the hand, the body's cell growth regulators react by speeding up cell division to create new tissue in the injured area as fast as possible.

Susan G. Komen for the Cure® Puerto Rico

Established in 2003, Komen Puerto Rico has worked hard to promote breast cancer awareness in our Island We strongly believe that early detection is part of the cure for this disease.
